

Executive Summary

AI Study Companion Pte Ltd is an Education Technology (EdTech) startup that provides an intelligent, AI-powered platform designed to enhance student learning through personalization, automation, and real-time feedback. The platform combines a conversational AI tutor, adaptive study planning, automated quiz generation, and performance analytics to help students study more effectively and achieve better academic outcomes.

The company targets secondary, tertiary, and lifelong learners who increasingly rely on digital tools for flexible and efficient learning. By leveraging artificial intelligence, AI Study Companion delivers customized learning experiences tailored to each student's strengths, weaknesses, and learning pace—addressing the limitations of traditional one-size-fits-all education methods.

Operating on a **freemium business model**, the platform offers core features at no cost while generating revenue through premium subscriptions that unlock advanced capabilities such as personalized study plans, predictive performance insights, and detailed analytics.

With the rapid growth of online learning and the rising demand for AI-driven solutions in education, AI Study Companion is well-positioned to capture a share of the expanding EdTech market. The company aims to establish a strong presence in Singapore before scaling regionally across Southeast Asia through school partnerships and digital marketing strategies.

In summary, AI Study Companion seeks to become a trusted digital learning partner—empowering students with smart, accessible, and data-driven tools to succeed in an increasingly competitive academic environment.

Goal:

To improve student learning outcomes by making studying more efficient, engaging, and personalized.

Company Description

Business Name: AI Study Companion Pte Ltd

Industry: Education Technology (EdTech)

The company focuses on leveraging AI to enhance student learning experiences. It aims to serve:

- Secondary school students
- College/university students
- Lifelong learners

Location: Singapore (with regional expansion plans)

Market Analysis

Target Market

- Students aged 13–25
- Schools and training institutions

Market Trends

- Increasing demand for **online learning tools**
- Growth of **AI in education**
- High smartphone usage among students

Competitors

- Quiz apps (e.g., Kahoot-style platforms)
- AI chat-based tutors

Competitive Advantage

- Personalized AI learning paths
- Localized content aligned with curriculum
- Real-time performance analytics

Company Organization

Role	Responsibility
CEO	Business strategy & partnerships
CTO	AI development & platform management
Product Manager	Features & user experience
Marketing Manager	Promotions & user growth
Content Specialists	Create academic content

Products & Services

Core Features

- AI Tutor Chatbot
- Auto Quiz Generator
- Progress Tracking Dashboard
- Smart Study Planner

Premium Features

- Personalized study plans
- Advanced analytics
- Exam prediction insights

Marketing Strategy

Channels

- Social media (TikTok, Instagram)
- School partnerships
- Influencer collaborations

Strategies

- Free trial for students
- Referral rewards program
- Campus ambassador programs

Positioning

“Your personal AI tutor—anytime, anywhere.”

Financial Projection

Year	Users	Revenue (SGD)	Expenses (SGD)	Profit/Loss
Year 1	5,000	50,000	80,000	-30,000
Year 2	15,000	180,000	120,000	60,000
Year 3	40,000	500,000	250,000	250,000

Key Assumptions

- Subscription: \$5/month premium users
- Growth through school adoption
- Initial losses due to development cost

Conclusion

The **AI Study Companion** has strong potential due to:

- Growing EdTech demand
- Increasing reliance on AI
- Scalable digital business model

With the right execution, it can become a **leading AI-powered learning platform** in the region.
